The Astrology you know from publications or other media is based, only, on your Sun sign. Whether you 'believe' in Astrology or are a skeptic, Astrology is not an outmoded tool of divination nor an pseudo science without empirical validity. It's a discipline that can help illuminate complex personality dynamics and predict future patterns. The craft of Astrology existed even before there was Science.

Serious Astrology is based on exact birth data: date, time and place of birth. It is meant to give people more insight and very often help them when turbulent and/or painful emotions. In my opinion it is a sacred Art, the Language of Nature and **Consciousness**.

For a Consultation I analyze and interpret your birth chart - **your potential** -. A two hour Consultation will include a thorough analytical discussion of life development in the past and a strategic focus on the time, concerns, and projects ahead. Clients are advised that the Consultation is a two-way discussion, not a one-way Astrological 'reading performance'. No jargon is used; matters are addressed as clearly, deeply, and directly as is pertinent, graceful, and helpful for understanding, practicality and empowerment.

I don't 'believe' in Astrology but experience it as a Language which I master. The foundation of the language: the 'concept' of Reincarnation, interpretation of the Archetypes and manifestation of consciousness. The alphabet consisting of the lights; Sun, Moon and Planets 'colored' by the different constellations. The birth chart as a map to know and understand in more detail the positive and more challenging qualities of the personality.

**The birth chart as blueprint of your potential  
and the evolution of your soul.**

## Code of Ethics

- With regard to the protection of personal data, the Dutch Privacy Laws are in compliance (WPB).
- The confidentiality of Client/Astrologer communication and data will be maintained. This eliminates the use of Client charts for lectures, articles, or in sharing a database with other Astrologers that contains such confidential material unless prior permission has been obtained in writing and/or names have been eliminated.
- All information obtained before, during and after a Consultation remains strictly confidential.
- From ethical considerations, no statements are being made with a focus on serious sickness, diseases, death or other explicit negative issues. Information which is not contributing to the well-being, growth and fulfillment of Clients potential. However, there can possibly be referral to the the regular medical or therapeutic circuit.
- Forecasts are made based on Secondary progressions, Solar Arc directions, the progressive Moon-phase, Transits and Solar Return. Explanation concerning 'destiny and free will' is exhaustively given so that the Client realizes that its own choice exists, within the framework of the horoscope.
- Horoscopes for third parties are only drawn after authorization from this person, with the exception of children under 12. When a composite horoscope (relational horoscope of two people) is drawn only the mutual horoscope is discussed

**Your potential? My passion..  
to give you more insight**

**As a Professional Astrologer** I am working in the Ancient and Classical Tradition. For over 40 years (I am born 1957, The Hague) I am studying Astrology, Astronomy, Philosophy and later Quantum Physics. By sifting the wheat from the chaff, I have developed highly effective analytical methods.

**Future trends or forecast;**

It is possible to make a prognosis or forecast based on the birth chart. I will look at what your situation is now and take that forward in time to create a time map for the weekend and the weekend is going to work out for you for the next twelve months (or more when needed). This is exceptionally useful, as it allows you to prepare. When you book your session I will ask you to submit any particular questions or issues that you want to make sure are covered during the reading.
